=== HEALTH EFFECTS AND FIRST AID===

INHALATION:

ANDÉAN:

ACUTE EXPOSURE- May cause irritation.

CHRONIC EXPOSURE- No data available.

FIRST AID- Remove from exposure area to fresh air immediately. Perform artificial respiration if necessary. Keep person warm and at rest. Treat symptomatically and supportively. Get medical attention immediately.

SKIN CONTACT:

ANDÉAN:

ACUTE EXPOSURE- May cause irritation.

CHRONIC EXPOSURE- No data available.

FIRST AID- Remove contaminated clothing and shoes. Wash with soap or mild detergent and large amounts of water until no evidence of product remains (at least 15-20 minutes). Get medical attention immediately.

EYE CONTACT:

ANDÉAN:

ACUTE EXPOSURE- May cause irritation.

CHRONIC EXPOSURE- No data available.

FIRST AID- Wash eyes immediately with large amounts of water or normal saline, occasionally lifting upper and lower lids, until no evidence of product remains (at least 15-20 minutes). Get medical attention immediately.

INGESTION:

ANDÉAN:

ACUTE EXPOSURE: Nausea, vomiting, diarrhea, headache

ANDÉAN MSDS

CHRONIC EXPOSURE- In addition to the effects detailed in acute exposure, there is no information on significant adverse effects.

FIRST AID- (If vomiting occurs keep the head below the hips to prevent aspiration). (Dreisbach, Handbook of Poisoning, 12th Ed.). Treat symptomatically and supportively. Get medical attention immediately.

ANTIDOTE:

No specific antidote. Treat symptomatically and supportively.

====STORAGE AND DISPOSAL====

Observe all federal, state and local regulations when storing or disposing of this substance.

****Storage****

Store in a tightly closed container.

Store away from incompatible substances.

====CONDITIONS TO AVOID====

May burn but does not ignite readily. Prevent dispersion of dust in air.

====SPILL AND LEAK PROCEDURES====

OCCUPATIONAL SPILL:

Stop leak if you can do it without risk. For small spills, take up with sand or other absorbent material and place into containers for later disposal. For small dry spills, with a clean shovel

place material into clean, dry container and cover. Move containers from spill area. For larger spills, dike far ahead of spill for later disposal. Keep unnecessary people away. Isolate hazard area and deny entry.

===PROTECTIVE EQUIPMENT===

VENTILATION:

Provide local exhaust or process enclosure ventilation. Ventilation equipment should be explosion-proof if explosive concentrations of dust, vapor or fumes are present.

===RESPIRATOR===:

The following respirators are recommended based on information found in the physical data, toxicity and health effects sections. They are ranked in order from minimum to maximum respiratory protection.

The specific respirator selected must be based on contamination levels found in the work place, must be based on the specific operation, must not exceed the working limits of the respirator and must be jointly approved by the National Institute for Occupational Safety and Health and the Mine Safety and Health Administration (NIOSH-MSHA).

Any dust and mist respirator.

Any air-purifying respirator with a high-efficiency particulate filter.

Any powered air-purifying respirator with a dust and mist filter.

Any powered air-purifying respirator with a high-efficiency particulate filter.

Any type 'C' supplied-air respirator operated in the pressure-demand or other positive pressure or continuous-flow mode.

Any self-contained breathing apparatus.

FOR FIREFIGHTING AND OTHER IMMEDIATELY DANGEROUS TO LIFE OR HEALTH CONDITIONS:

Any self-contained breathing apparatus that has a full facepiece and is operated in a pressure-demand or other positive-pressure mode.

Any supplied-air respirator that has a full face piece and is operated in a pressure-demand or other positive-pressure mode in combination with an

auxiliary self-contained breathing apparatus operated in pressure-demand or other positive-pressure mode.
